Proctoring Software: SMOWL

SMOWL is a standard Proctoring Software at TUDa. If you decide to take a remotely proctored exam at TUDa (or you decide against an on-site exam), you need to make yourself familiar with SMOWL.

Your first task is to read all information textpages, which are given in stage 1 of your entrance exam course on moodle exam. Confirm in stage 1, when you understood everything.

ID Controll is task 2 In stage 2 of the course your entrance exam, you do the registration of your ID for the remote supervised exam.

Technical Testruns and Choice for remote or on site In stage 3 you go throught demo exams as often as you need. You´re responsible that every componement of SMOWL works as intended. Manual is given in this stage and tutorial in the demo exam. If you want to travel to the Technische Universität Darmstadt to use the computer lab for entrance exam, then you may skip stage 2 and demo exams of stage 3.
